Use within 30 days after first opening. The product contains polyols, excessive consumption might have laxative effects.

PURIFICATION: ORIGINS AND TRADITIONALLY USED PLANTS

Purification and detoxification have been the basis of many natural healing methods for more than a hundred years. At the beginning of the 1900s, some doctors discovered that the blood is loaded with toxins coming mainly from the intestine (autointoxication) due to the activity of putrefactive bacteria on undigested food in the colon.

Detoxifying or purifying the body is a natural way to help eliminate toxins. On a daily basis, we are exposed to a multitude of external substances that are toxic to the body: when eating a variety of foods, drinking water or even breathing. **An organism burdened by toxins can present a wide variety of symptoms such as: fatigue, constipation, difficulty in digestion, weight gain, gas, bloating, irritability, etc.. The plants, at the base of IMopro DETODRAIN formulation, have been traditionally used since ancient times as they are particularly suited to help the organism restore its condition of physiological balance, at seasonal changes.**

Dandelion. Already in the 10th century, Arab doctors recommended dandelion as a **blood purifier**. Since the sixteenth century doctors started talking about "dandelion therapy", a therapy in which dandelion was used to **detoxify and purify all the organs of the body, in particular during changes of season.**

Artichoke. Greeks called it Kinara, Romans called it Cynara: loved by both civilizations, it was probably a wild variety. In cooking, thanks to its delicate taste, it was already appreciated since the times of ancient Egyptians. In the fifteenth century artichoke was already common in Italy. **Traditionally used to support hepatobiliary function and to treat digestive disorders.**

Milk Thistle. The beneficial properties of milk thistle on the liver have been recognized for a long time by traditional medicine, which uses the plant (fruits and leaves) precisely for the **treatment of hepatic disorders**. Moreover, milk thistle is also used as an antidote in case of poisoning by poisonous mushrooms of the genus Amanita.

Chicory. Native to Greece, like olive and broad beans. Ancient Greeks called it Kichora and considered it as a medicine more than a food, so much that the doctor of Greek origin Dioscorides, recommended it as a **digestive aid ante litteram** and Pliny the Elder attributed it for its **cooling properties**.

Pineapple. It is believed to be native to South America, in places such as Brazil and Paraguay, where it was discovered by Columbus (1493). Most of the benefits derived from the consumption of pineapple or natural remedies extracted from the stem or from the fruit, revolve around bromelain: a well-known active principle which gives this fruit its characteristic properties such as **favouring diuresis and fighting water retention**. In addition, **bromelain has digestive properties and helps to assimilate proteins**, as well as having important **antioxidant properties**.

Ginger. It was widely used by ancient Greeks and Romans, appreciated by famous people and great scholars of the past centuries: Confucius believed it could **eliminate impurities** and clear the mind, doctor Dioscorides recommended it for warming up the stomach and calming it in case of upsets, whereas Pythagoras believed, it could cure snakebites like a modern antidote.

Other IMopro line products also available:

IMopro COLOSTRUM Plus Bovine colostrum and Vitamins based food **supporting immune system.**

IMopro DONNA typed Probiotics, Inulin, Vitamin B6, Selenium and Bilberry based food supplement **supporting women's gastrointestinal and urogenital well-being.**
